

THE GUIDE TO YOUR STAR STUDENT REPORT CALIFORNIA STANDARDS TESTS

CALIFORNIA DEPARTMENT OF EDUCATION

This guide will help you follow your child's report and the recommendations that are provided. Some sections of your child's report are translated word for word, and other sections are translated more generally.

1 Your child's information

Here you find your child's student number, date of birth, grade, test date, school, and district. If available, your mailing address also appears in this section.

2 Introductory Letter from the State Superintendent of Public Instruction

Dear Parent/Guardian,

Each year, California's Standardized Testing and Reporting (STAR) Program measures your child's progress in meeting California's world class content standards. These standards describe what all students should know and be able to do at each grade level.

This report shows your child's scores on the STAR Program tests. I encourage you to discuss these results with your child and your child's teacher(s). Besides giving you valuable information about your child's academic strengths and weaknesses, test scores help us understand how well our schools are doing and how we might do better in the most important job of all – preparing students to succeed in school and beyond.

3 Your child's scale scores and performance levels

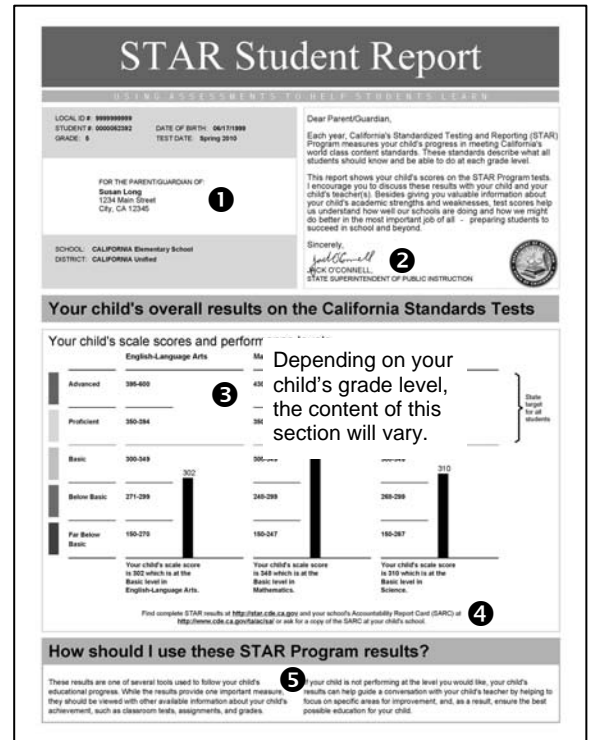

See how your child did on the California Standards Tests (CSTs) by looking at the vertical black bars below each subject heading. The number at the top of each bar is your child's exact test score in that subject. The colored boxes to the left and the text at the bottom of each black bar provide your child's performance level in each subject. There are five performance levels: advanced, proficient, basic, below basic, and far below basic. The goal in California is to have all students perform at the proficient or advanced level.

Students in grades two through eleven are tested in English–language arts and mathematics. Students in grades five, eight, and ten are tested in science, and some high school students also may take end-of-course science tests. All students in grades eight and eleven are tested in history–social science, and some high school students take an end-of-course world history test. Scores are provided for all of the tests your child took. If your child did not take one or more of these tests or if a score was not to be reported, this is noted on your child's report.

4 You can find complete STAR Program results on the California Department of Education (CDE) "STAR Results" Web page at <http://star.cde.ca.gov> and your school's accountability report card on the CDE "School Accountability Report Card (SARC)" Web page at <http://www.cde.ca.gov/ta/ac/sa/>. You can also request a copy of the SARC from your child's school.

5 How should I use these STAR Program results?

This section suggests ways to monitor your child's educational progress, including through classroom tests, assignments, and grades. You can use these sources of information to talk with your child's teacher about specific areas for improvement.

6 A note on using this information

A single test can provide only limited information. A student taking the same test more than once might score higher or lower within a small range in each content area tested. You should confirm your child’s strengths and needs in these topics by reviewing classroom work, standards-based assessments, and progress reports during the year.

7 Your child’s strengths and needs based on these tests

These charts show how your child did in the different content areas for each test taken. The subject for each test is listed at the top of each chart. Most reports for students in grades two through eleven include English–language arts and mathematics. Reports for students in grades five, eight, and ten include science. Reports for students in grades eight and eleven include history–social science. Reports for high school students may include results for end-of-course tests in science and world history.

The questions on the CSTs are grouped into the content areas shown on the left of each chart. These content areas are based on the California content standards, which describe what your child should know and be able to do at each grade. (If your child did not take any of the CSTs expected for his/her grade or if a score was unable to be reported, this is noted on the report.)

Next to the name of each content area are the number of questions your child answered correctly in that content area and the percentage of questions your child answered correctly in that content area, represented by a diamond on the chart. The bar shows the percent-correct range of scores for students in the state who scored at the proficient level on the CST for that subject. Below the chart is additional information about your child’s performance on each test.

8 This section contains one of the following types of information:

- More information about the English–language arts content standards and the grade-level mathematics content standards (grades two through four, six, and seven) or Algebra I standards (grade seven)
- Content area results in science (grades five, eight, and ten), history–social science (grades eight and eleven), and end-of-course CSTs
- Additional resources (grade five)

9 California Reading List (CRL) and/or More about the STAR Program or Early Assessment Program (EAP) (for grade eleven)

CRL — This recommended reading list number is based on your child’s California English–Language Arts Standards Test score. Your child should be able to read titles within the list independently. Of course, no single test will tell you what books your child can or should read—encourage your child to explore other reading list numbers to find books of interest. Strong reading skills are critical for success in all school subjects. Encourage your child to read at home.

To access the California Reading List:

1. Visit the CDE “STAR Results” Web page at <http://star.cde.ca.gov> and select the “California Reading List” link.
2. Select “Search for a Reading List” to find books for your child.

EAP — If your child is in grade eleven and took the California State University (CSU) Early Assessment Program (EAP), this section also provides the EAP status. EAP statuses are used to provide an early indication of a student’s readiness for college-level English and/or mathematics courses at the CSU or participating California Community Colleges (CCC). Additional information regarding the EAP can be found on the EAP Web site, at <http://www.collegeEAP.org>.

10 More about the STAR Program

This section provides information about how you can find answers to your questions about the STAR Program and your child’s STAR test results.

SUSAN LONG

Your child’s strengths and needs based on these tests 6

A NOTE ON USING THIS INFORMATION: A single test can provide only limited information. A student taking the same test more than once might score higher or lower within a small range in each content area tested. You should confirm your child’s strengths and needs in these topics by reviewing classroom work, standards-based assessments, and progress reports during the year. The release of test results is a public record under the California Public Information Act. A complete copy of the release of test results is available at <http://www.cde.ca.gov/ta/tm/ta/r/>. To access data for the most recent test results, click on the “STAR Results” link on the left side of the page. For more information, visit <http://www.cde.ca.gov/ta/tm/ta/r/>.

8 In the charts below, your child’s performance is compared to the percent-correct range of scores for students whose performance was at least Proficient on the test. Percent is the ratio of correct answers.

English-Language Arts		Mathematics	
Content Area	GRADE 5 Your Child: # Correct / % Correct Range of Proficient Scores	Content Area	GRADE 5 Your Child: # Correct / % Correct Range of Proficient Scores
Reading	6 42%	Estimation, Patterns, and Functions	6 60%
Writing and Vocabulary Development	6 42%	Operations with Fractions and Decimals	9 62%
Reading Comprehension	7 44%	Algebra and Functions	11 68%
Literary Response and Analysis	1 32%	Measurement and Geometry	4 27%
Writing	2 12%	Statistics, Data Analysis, and Probability	1 26%
Writing Development	6 31%		

= Number of Correct Items % = Percent Correct

Science		Additional R	
Content Area	GRADE 5 Your Child: # Correct / % Correct Range of Proficient Scores	Content Area	GRADE 5 Your Child: # Correct / % Correct Range of Proficient Scores
Physical Science	4 26%	Calendar, Calendar and Time Models	6 60%
Physical Science	5 32%	Standards for Science	6 60%
Life Science	2 12%	Standards for Science	6 60%
Life Science	3 18%	Standards for Science	6 60%
Earth Science	2 12%		
Earth Science	1 6%		

= Number of Correct Items % = Percent Correct

9 California Reading List (CRL) **10** More about the STAR Program

Your child’s recommended California Reading List Number is:

The recommended reading list number is based on your child’s California English–Language Arts Standards Test score. The CRL will provide you with a list of titles at high school levels that books you can use or that you can explore other reading list numbers to find books of interest.

To access the California Reading List:

- Visit <http://star.cde.ca.gov> and click on California Reading List
- Click Search for a Reading List to find books for your child

Get more about the STAR Program or your child’s test results by clicking on the “STAR Results” link on the left side of the page. For more information about the STAR Program, visit the sample performance and standards site: <http://www.cde.ca.gov/ta/tm/ta/r/>
